February 21, 1907.

My dear Madam:-

The Editor of the Daily Mail has forwarded to me here your note of Feb. 10. You ask about the sources of my information and in reply I can only say that all the facts related in my article are matters of common knowledge here, though they are by no means so impressive and bizarre to the Americans themselves as they are to an Englishman like myself temporarily resident here.

Of course the most successful of all the sects is that of the Christian Scientists. Mrs. Mary Baker Eddy, as you are probably aware lives at Concord, New Hampshire.

If I can give you any information on specific points I should be most happy to do so.

I am,

Faithfully yours,

W. Russell Smith
