might not be a high value, but I think consistency of a religious experience is important within an age of frenetic change, especially when that group carries the name "church".

- I find myself a bit concerned about having a central theology stated as briefly as "Jesus in Lord". While I don't believe that an extensive systematic theology is appropriate for an organic movement, I am a bit wary of uniting around that simple statement. My most concrete reason for that wariness is because I have personally had both Mormons and Jehovah's Witnesses tell me that they are in full agreement with that sentiment. I find those experiences telling.
- One small but I think meaningful observation: I doubt that those advocating an organic movement of church life have grappled adequately with all the pitfalls of a highly litigious society.
- Finally, I would like to believe that a healthy organized church, under the right leadership, could incorporate enough of the ideals expressed in *The Forgotten Ways* to sponsor a missional movement that would benefit from the financial stability, leadership and accountability of a more enduring central organization.

All that being said, I feel I have been enriched by many of the concepts and exhortations found in this book. I would recommend this book for those who wish to grapple seriously with the full range of the responsibilities a local church should assume. I believe that such grappling would yield the most fruit when carried out in a context where a group of diverse but open-minded individuals could discuss Hirsch's ideas at length. His thoughts are too good to be ignored but innovative church strategy is too important to be settled quickly.

The Forgotten Ways: Reactivating The Missional Church

Hirsch, Alan. The Forgotten Ways: Reactivating The Missional Church. Grand Rapids: Brazos Press, 2006

The Forgotten Ways explores what Alan Hirsch maintains are the basic elements of what makes a missional movement. He starts with an analysis of the early church and the church in China—groups without legality, buildings, professional leadership, seeker-sensitive services or much in the way of Scripture—and asks how did they foster their phenomenal growth? The answer, he says, lies not in anything that can be packaged as a new program. Rather it stems from what he terms Apostolic Genius which is latent within the people of God and made up of six inter-relating elements of missional-DNA (mDNA):

1. Jesus is Lord—The early church and believers in China distilled the message down to this simple confession (or sneezable virus) that recognized the claims of the one God over all of life. To counter the sacred/secular dichotomy, Hirsch contends: 'Following the impulses of biblical monotheism rather than setting up some sacred spaces, our task is to make all aspects and dimensions of life sacred—family, work, play, conflict, etc.—and not to limit the presence of God to spooky religious zones' (p.95).
2. Disciple Making—Contrary to consumeristic patterns of faith, Hirsch reminds us that the lifelong task of a disciple is becoming like Jesus and embodying his message (like little Jesus in our communities). Rather than expecting to think our way into new ways of acting as if we only need to know the right things, Hirsch calls believers to action and obedience, quoting, among others, TS

- Eliot: The greatest proof of Christianity for others is not how far a man can logically analyze his reasons for believing, but how far in practice he will stake his life on his belief (p.101).
3. Missional-Incarnational Impulse—Rather than relying on an evangelistic-attractional mode to bring people into church, the missional-incarnational impulse seeks to seed and embed the gospel in the midst of cultures. This takes discipline to practice what he explores as presence, proximity, powerlessness and proclamation. Grassroots groups such as Upstream Communities in Perth and Third Place Communities in Hobart are test cases of communities of Jesus followers seeking to live life and do church in ways consistent with the rhythms and needs of their local communities.
 4. Apostolic Environment—Hirsch describes apostolic leaders as custodians of the mDNA. They are the servant-inspirers who cultivate an environment for other leaders and ministries to emerge. An important part of this is APEPT leadership drawing on Ephesians 4:7-13—including those gifted in Apostolic, Prophetic and Evangelistic ministry (who are sometimes sidelined in the church) as well as Pastoral and Teaching ministries (which a lot of training and expectations are about in the church today).
 5. Organic Systems—Rather than an institutional approach to organization where CEO-styled leaders direct with a command and control CEO-approach to leadership, missional movements spread more organically. When groups network as organic systems they can unleash their members to flexibly interact with one another and their environment. Rather than retreating from the chaos of change, they can embrace it and flow with the rhythms of life: Planting a new church, or remissionalizing an existing one, in this approach isn't primarily about buildings, worship services, size of congregations, and pastoral care, but rather about gearing the whole community around natural discipling friendships, worship as lifestyle, and mission in the context of everyday life. As a living network in Christ it can meet anywhere, anytime and still be a viable expression of church. This is a much more organic way to plant a church or to revitalize it (p.185). This is a theme, in fact, of the whole book and is explored further in an addendum.
 6. *Communitas*, not community—Rather than seeking

community as an end in itself, Hirsch explores the ideal of having our imagination captured by seemingly impossible mission challenges, out of which *communitas* evolves. He draws on Victor Turner's anthropological analysis of *communitas* (how a group forms together around a dangerous journey or mission) and liminality (a transition process accompanying a fundamental change). In one sense, the context of post-Christendom which has marginalized the place of church in society and the way we face rapid discontinuous changes in the twenty-first century forces us into liminality, but in another sense liminality is where we belong anyway as the pilgrim people of God.

Each of these elements is important in themselves but when they operate together they create the synergy of Apostolic Genius and can foster phenomenal growth. Strengthening any one area can help a local church grow and be more healthy, but fostering all of these elements is how this kind of material in *The Forgotten Ways* can foster missional movements. Other books treat individual elements in themselves, but this book significantly explores them together, not to bolster up the church as institution but to cultivate a movement of organic growth.

Hirsch has led a local church and a denomination through processes to reflect on their missional fitness, planted churches among subcultures, started (and closed down) an innovative missional café project, started Forge Mission Training Network in Australia and consulted with missional groups around the world. He draws on these experiences, and on his reading of history and Scripture, to point towards new imaginative ways of doing mission and church. These ways that he suggests, though often forgotten, echo movements like the early church and China. While we do not face the same persecution as those two groups, we do face the adaptive challenge of dealing with rapid discontinuous change and the thirst for spirituality and community in Western societies. His reflections are worth reading, reading again and most importantly acting upon.

The Forgotten Ways is a welcome and significant addition to the literature on mission to the West written by a leading missiological strategist. It will prove to be a useful tool to help shape new forms of missional church—for church planters, those leading change in existing churches and all mission-hearted followers of Jesus. It is not an academic tome but a handbook for practitioners. I am using it to evaluate missional churches I am visiting and learning from, and as a compass to guide a missional experiment in our neighborhood. A blog and further resources

(including a missional fitness tool and APEPT analysis) is accessible at www.theforgottenways.org.

The Forgotten Ways: Reactivating the Missional Church

Alan Hirsch, The Forgotten Ways: Reactivating the Missional Church. Grand Rapids, MI: Brazos Press, 2006, pgs. 295.

The Forgotten Ways: Reactivating the Missional Church is Alan Hirsch's second most significant publication. His first work, *The Shaping of Things to Come: Innovation and Mission for the 21st Century Church* was co-authored with Michael Frost. Hirsch, who also teaches adjunctively for Fuller Theological Seminary, is originally from Australia and is the founding director of Forge Mission Training Network.

The book is divided into two primary sections. Section One is entitled "The Making of a Missionary," and provides a brief account of Hirsch's journey into the world of church planting. It is this section that sets the stage for the second section of the book. By the time the reader completes section one, he or she has a good understanding of the missionary methods that Hirsch found to work well and not so well in his Australian context. This first section is critical to the overall book in that it not only provides a glimpse into Hirsch's church and denominational life, but also is used as illustrative material in the second half of the book.

The second section is entitled, "A Journey to the Heart of Apostolic Genius," and it is here that Hirsch notes that the "rubber hits the road" (24). This latter section is the heart of the book where Hirsch attempts to describe the apostolic nature of the Church and the D.N.A. that causes the church to be a missional body of believers.

Overall, I was very pleased with the contents of this work. Though there are a few matters of concern, which I will address below, I found Hirsch's work to be challenging and inspiring as he seeks to assist the reader in being apostolic in his or her mis-
