Purpose:

To prepare students for ministry by training them to analyze and address issues in the arenas of healthcare and biotechnology from a Christian perspective. To develop ministers who are responsive to the needs, contexts, and insights of parishioners and members of the larger community who are patients, family members of patients, or practitioners. To enable ministers to equip their congregations for understanding their moral responsibility in decisions about the delivery and receiving of health care and the impact of social decisions in health care and biotechnology on the broader community.

This course focuses on the bioethical issues that most commonly arise for pastors, chaplains, and other caregivers in clinical settings. Specifically, the course examines the cultural and religious meanings of and the moral response to sickness, disability, and death. The course includes a field trip and consideration of how Christian death rituals, specifically the funeral.

This course is one of three 2-hour bioethics courses. The other two examine human biotechnologies (focusing on genetic alteration, abortion, stem cell research, etc.) and on ecology.

OBJECTIVES:

Students will be able:

- To demonstrate competence with various Biblical and Christian traditions used in responding to moral issues in the fields of health care, in particular those most likely to arise in pastoral care (especially around death & dying, sickness & disability, and obtaining healthcare).
- To demonstrate competence with various ethical categories and frameworks used in responding to health care and biotechnology issues.
- To demonstrate competence in utilizing social and cultural analysis in response to contemporary health care and biotechnology issues.
- To explain how healthcare technology can assist and/or hurt various individuals and groups in society.
- To apply ethical analysis in developing responses to healthcare issues at a congregational and/or institutional level.
- To explain how responses to moral problems and moral integrity shape congregational life.
- To recognize the distinctive insights arising from particular social locations (these include particularity arising from ethnic, gender, and class location; also, specific recognition of the insights of persons with disabling conditions).
- To describe how responses to bioethical concerns shape society.
As a core elective course in ethics, students will be able:

**Students will be able:**
- To demonstrate competence with various Biblical and Christian traditions used in responding to selected moral issues.
- To demonstrate competence with various ethical categories and frameworks used in responding to specific contemporary moral issues.
- To demonstrate competence in utilizing social, cultural, and/or historical analysis in response to contemporary moral issues.
- To apply ethical analysis in developing responses to moral issues at a congregational and/or institutional level.
- To recognize the distinctive insights arising from particular social locations (these may include, but are not limited to, particularity arising from ethnic, gender, class, and geographic location).

**EXPECTATIONS:**

**Written Work:** 10 -12 page term paper. Term paper options #1 & #2 do not require approval of topic; #3 does. Make sure the paper includes a "fair" consideration of all major positions and a clear assertion of the position you hold. The papers should include moral reasoning explicitly intended for the Christian community, as well as arguments that would be coherent in a highly secularized setting. Do not focus on counseling issues, but on social and cultural factors and on moral reasoning.

1. **What is the role of Christian funerary ritual in the spiritual, physical, and moral care of the dying?**
2. **How can definitions of sickness and disability alter the ethical response to marginalized persons?**
3. **Open topic, but must focus on ethics, not counseling or pastoral care.**

All written work must be typed with 12 point type, one inch margins on all four sides, and true double spacing. Do not include substantial quotes from Scripture; use citations. Written material will be evaluated for reasoning, referencing, and for structure and grammar. All references must be noted properly: include page numbers or download information, when appropriate (please use endnotes, not footnotes; specific style of notes is open, but be consistent). Follow page limit requirements. Required length of paper does not include reference or title pages.

In accordance with ATS policy, all written work must use inclusive language when reference is made to human beings (male and female). This provides for both greater inclusion and greater precision.

Papers are graded anonymously. Each paper should include a title page with the student’s name and SPO or other number (do not use Social Security number). All subsequent pages should include only the SPO or other selected number, written in the top right corner.
Final Examination: A one-hour, in-class final. Part of the exam will be an objective examination over concepts in medical ethics and part will be a response to a case study. The exam will be given on Monday May 10 at 6:30 pm. Students who live at a great distance may arrange ahead of time to take the exam elsewhere, if proctored. As with the papers, the exam will be graded anonymously.

Participation: Students are required to complete all assigned readings. Acknowledgement of completion will be sought the last day of class. Failure to complete readings on time may result in a lowering of the final grade, as will poor attendance for class. The deduction for low participation and/or late or incomplete reading of assigned material will be up to 10% against the final grade (a full letter grade reduction).

On Campus: On campus students must be present at the initial meeting to schedule future discussion sessions. At those sessions the material assigned will be discussed using the questions found in the text boxes as the basis for conversation. Participation will be valued on quality, not quantity.

ExL: ExL students are to view videos and complete reading prior to making an initial 1 ½ - 2 page entry by the assigned deadline. This entry does not require formal citation, though reference to the readings is appropriate. The next date designated in the “text box” is the deadline for responding with 1 – 1 ½ pages each to two entries by other students; these can be to the students’ initial entries or to later entries on a thread. All entries must be reasonably well-written, but unless incoherent, no assessment will be made of the grammar, etc. (the emphasis will be on the quality of analysis).

FINAL GRADE:
Term Paper 60% Date: May 3 Time: 9:00 am
Examination 40% Date: May 10 Time: 6:30 pm
Class Participation Deduction if lacking
Reading Deduction if lacking

Grade Range: Work for CS 680 will be evaluated at a graduate/professional school level.

A (93-100) = Exceptional work: surpassing, markedly outstanding achievement of course objectives.
A- (90-92) =
B+ (87-89) =
B (83-86) = Good work: strong, significant achievement of course objectives
