In order to function as a competent clinician, one must develop competence in diagnosing and effectively treating a variety of problems with which they are confronted. In order to do this one must be thoroughly familiar with a variety of treatment modalities. This course is designed to provide students with an introduction to assessment, clinical diagnosis and treatment planning. Students will have an opportunity to become acquainted with material relevant to treatment issues both from a Christian historical perspective and current knowledge.

As a result of completing this course, students shall:

1. Become familiar with principles for applying Christian thought to the field of counseling.
2. Learn how to conceptualize cases from various theoretical perspectives.
3. Develop the ability to think like a clinician using relevant diagnostic information.
4. Value a collegial process in the development of treatment plans.
5. Learn how to develop and implement treatment plans including cultivating the ability to assess progress and formulate timelines.
6. Learn the value of and how to keep effective treatment records.
7. Understand how to effectively utilize supervision to facilitate quality treatment.
8. Understand the role of psychotropic medications and mood altering chemicals in the treatment of mental and emotional disorders.
9. Understand how to make appropriate treatment referrals.
